Summary

I am a Software Engineering student, currently in my sixth semester, with solid experience in Robotic Process Automation (RPA) tools and systems development. I have a strong interest in learning and exploring new technologies, as well as the ability to adapt to different contexts. I am eager to build efficient technical solutions and constantly look for new challenges that allow me to grow professionally and contribute to impactful projects.

Education

Pontifical Catholic University of Minas Gerais Feb 2024 – Dec 2027
• Bachelor's degree in Software Engineering.

Professional Experience

BlueTape, Software Development Intern Aug 2025 – present
• Development of Python scripts for legal process automation and web scraping with Selenium. Responsible for data handling and analysis using Pandas, as well as managing AWS resources.

Pontifical Catholic University of Minas Gerais, Teaching Assistant - Modular Programming Mar 2025 – July 2025
• Supported student groups in understanding and applying the core principles of Object-Oriented Programming (OOP), including encapsulation, inheritance and polymorphism, using Java.

Projects

ERP - Vórtex autopeças Aug 2024 – Dec 2024
• Management system (ERP) for a fictional client in the auto parts industry, with a Java (Spring Boot) backend, web frontend and SQL database hosted on Azure.

Show Certo Feb 2026 – July 2026
• Full-stack platform built to connect artists and venues. Architecture based on FastAPI in the backend, PostgreSQL database integration and a front-end with React and Flutter.

Alerta Concursos Apr 2026 – present
• Scraper for Brazilian public service job openings with filtering by state, region and field of interest, sending notifications via Telegram or email. Data persisted in SQLite/PostgreSQL, with optional AI analysis of PDF notices (Gemini or local Ollama) to generate summaries.

Certifications

AWS Certified Cloud Practitioner Jan 2026

Microsoft Certified: Azure AI Fundamentals (AI-901) Aug 2026

Skills

Languages: Java, Python, JavaScript, SQL
Frameworks and Libraries: Spring Boot, Django, FastAPI, React, Flutter, Pandas, Selenium, Beautiful Soup
Databases: PostgreSQL, MySQL, DynamoDB
Tools and Cloud: AWS, Git/GitHub, Linux, Docker
Concepts: OOP, MVC, REST API, Data Structures, RPA
Spoken Languages: Portuguese (native), English (intermediate)
